SIERRAS DE PANELES REVESTIDOS (SANDWICH)

Sierras circulares con puntas de metal duro para cortar paneles de espuma recubiertos de chapa o de acero, liso y corrugado. Utilizable en máquinas o instalaciones de aserrado manuales, y en segadoras automáticas o dispositivos para la producción continua.

TCT CIRCULAR SAW BLADES FOR COVERED PANELS

Tct circular saw blades for cutting of expanded smooth and bended resin covered with sheet or steel panels. Useful on manual and automatic sawing machines and equipment for continuous production.
